School Site: Snowflake High School
Buildings:
1006 600
1020 Library, classroom

Description of Problem

Please include a detailed description of the issues, as well as a description of and a copy of any professional studies, citations or reports from government entities, recommended solutions, and any cost information or estimates. If additional space is needed, please attach.

Building 1020 was built in 2001 and building 1006 was renovated in 2001. There is no warranty left on the roofing systedm. The roof has been losing shingles since it was built. The contractors came back and repaired the roof until the warranty expired. District staff have repaired it and maintained it the best they could but each year the roof leaks inside. The nails are working there way up thru the shingles because we have been told the pitch of the roof is too low and that the shingles should never have been installed on this building. The Arizona Risk Retention Trust has come and done repairs on the inside of the facility as a result of the several leaks over the years. They have told the district that they will not repair anymore damages until the district repairs the roof. The school distict has had several companies look at this roof and we have bids to redo twith T.P.O. The district believes this to be a better solution to the problem. TPO has a warranty of at least 20 years.

Project Category: Roofing

Are any of the above-described issues in buildings or part of buildings that are leased to another entity, including a district sponsored charter school? N

Available Funding

Current unencumbered building renewal fund balance (Fund 690):	\$3,431.36
Amount of Local funds planned for this project	\$0.00

Please outline any associated insurance coverage.

No special circumstances. AZ Risk Retention Trust determined they were not responsible for repairs.
